```php
1 uopz_set_return('func', function($args) {
2  try {
3    $ret = func($args);
4  } catch($e) { /* Exception handling */ }
5  // Log function name, arguments, errors and
       exceptions
6  return $ret;
7 }, true);
```

Listing 2: Instrumenting (non-)native PHP functions with UOPZ.
